Internship

Full Stack Web Developer Intern

April 2025 – Present

OBDSmart

- Built a scalable React dashboard to efficiently display and manage 1000+ rows of data on the front end.
- Built multiple backend APIs using Multer, including one to upload Excel files from the frontend, extract data, and update the database table.

Projects

Second Brain | TypeScript, React.js, Tailwind CSS, MongoDB, Express.js, JWT, Docker

Nov 2024 - April 2025

- Implemented functionality to save YouTube videos and X (Twitter) posts for future retrieval and reference.
- Containerized the frontend and backend using Docker, created a Docker Compose file to run the project, and integrated CI/CD pipelines.
- Built an API to generate public URLs for saved videos and posts, allowing anyone to access them without login.
- Applied MERN stack knowledge successfully to create a fully functional MERN stack website.
- GitHub Repository Link: [Second Brain](#)

ReelPro | TypeScript, Next.js, Tailwind CSS, Next Auth, Zod, MongoDB.

Feb 2025 - April 2025

- A video-sharing platform with easy video uploads, secure user login, and an engaging UI for interactive content sharing and viewing.
- A platform for uploading and sharing short-form videos, featuring secure user authentication and an interactive UI for content interaction.
- A video-sharing platform with secure user authentication, video uploads, and a user-friendly interface for seamless content engagement and sharing.
- Github Repository Link: <https://github.com/harshitduttshukla/ReelPro>

Certificates
